1. Introduction

Blockchain and digital assets have entered our lives at a rapid pace. During the current era, we have the chance to build our own decentralized economy, better the world, meet likeminded people, and share our positive energy around the globe.

NoleCoin community members, hereafter Nolians, will be motivated to be a creator, learn to take their life in their own hands, and achieve success with their fellow Nolians. That is what NoleCoin is all about: for the community, by the community.

NoleCoin started as a community experiment with a vision

We believe through the power of the blockchain we can better the world and do it more efficiently than any other philanthropic institution could do with the power of the current crypto community and the transparency of the blockchain. We can better the world by building useful and epic products that at the same time contribute to bettering the global state of the world.

When something is important enough you do it, even if the odds are not in your favor

We introduce you to NOLE

The community is invited to participate. Founders and developers alike work on a voluntary basis and became shareholders of the project. Built by the community for the community!

The community is the team. That means everyone in the community is participating in building the project. We have several community chats where the discussions are running, and now joining Reddit to search for more forces to make our vision a reality.

The NoleCoin community exists out of entrepreneurs, developers, creators, influencers, philanthropists, financiers, and more!

Welcome to the NOLE family and thank you for reading the whitepaper. Let's get started!

2. Ecosystem

The NoleCoin ecosystem exists of several products that contribute to the idea that everyone can be their own bank, and transparently transfer funds all around the world. The number of products and partnerships will continuously be expanded as the community continues building.

NoleLegends

NoleLegends is a web based Metaverse game that enables players to take ownership in their own hands, like if it's their own land. The ownership lies with the consumer instead of the creator.

Non-Fungible Tokens

Ever since the introduction of Non-Fungible Tokens (NFTs), they have shown that they have the potential of changing the complete gaming world. The rise of NFTs promises a new and exciting era where players take up even more critical roles in the gaming economy and receive befitting real-time rewards in the process. Today, this gaming paradigm has begun to take shape as game developers are increasingly using blockchain technology to give their games an even more rewarding experience.

What is a Play-to-Earn Game like NoleLegends?

NoleLegends combines conventional gaming designs with unconventional game mechanisms to let users have more control over in-game assets like statues, characters, potions, virtual lands, and much more. This is made possible by launching the game on the blockchain and anchoring it with a digital asset-powered economy. These digital assets are often NFTs so that they are distinguishable and tamper-proof. The adoption of NFT standards also allowed us to preserve the rarity and uniqueness of some of these in-game Legends. Therefore, some blockchain game assets are considered more expensive than others.

Charity

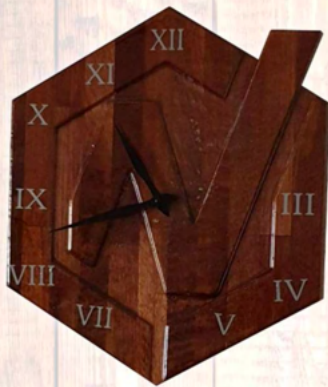

Since the start of the project, we are contributing to charity events and motivate the transparency of the blockchain, the Nolians have donated over 50'000 dollars to charitable causes and are still doing it until this day. everything we do in our ecosystem will contribute to charity and will better the world.

We have also created charity events ourselves: charity.nolelegends.com

NC NOLECRAFTS

Nolians SuperHuug and Annepan set up a product line with handcrafted NoleCoin-themed gadgets. They have their own [website](#) at which you can order fully customized crafts and pay with the NoleCoin currencies.

Nolians are invited to start their own project and will be guided with their entrepreneurship via NoleCoin.

3. Currencies

NoleCoin

NoleCoin (\$NOLE) has been created to provide value for the complete ecosystem. It is the first currency in the ecosystem and the Nolians are holding it with pride. The currency is established on the TRON blockchain and has an undisputed reputation. NoleCoin opened all doors for us to start our crypto journey and the launch was a historic event for all Nolians.

1'000'000 initial supply
Deflationary

2'000 transactions per second
Deployed as **TRC20** on TRON

NoleWater

The magical water was made as a reward for all loyal NoleCoin holders: those who obtained and collected NoleWater (\$AMSK) are now able to put it to use in the NoleLegends game, where they can feed their NFT legends NoleWater to earn a crypto income. NoleWater also has been added to several gaming and gambling sites and over 2.3 million wallets around the world are holding NoleWater.

Gaming token
NoleLegends' main currency

10'000'000'000 supply
Transactional **TRC10** token

Nolian Credits

Since we wanted to grow with our ecosystem and meet new like-minded people, we created Nolian Credits (\$NLCR) on the Binance Smart Chain and set the goal to meet 10'000 new Nolians in a short period of time.

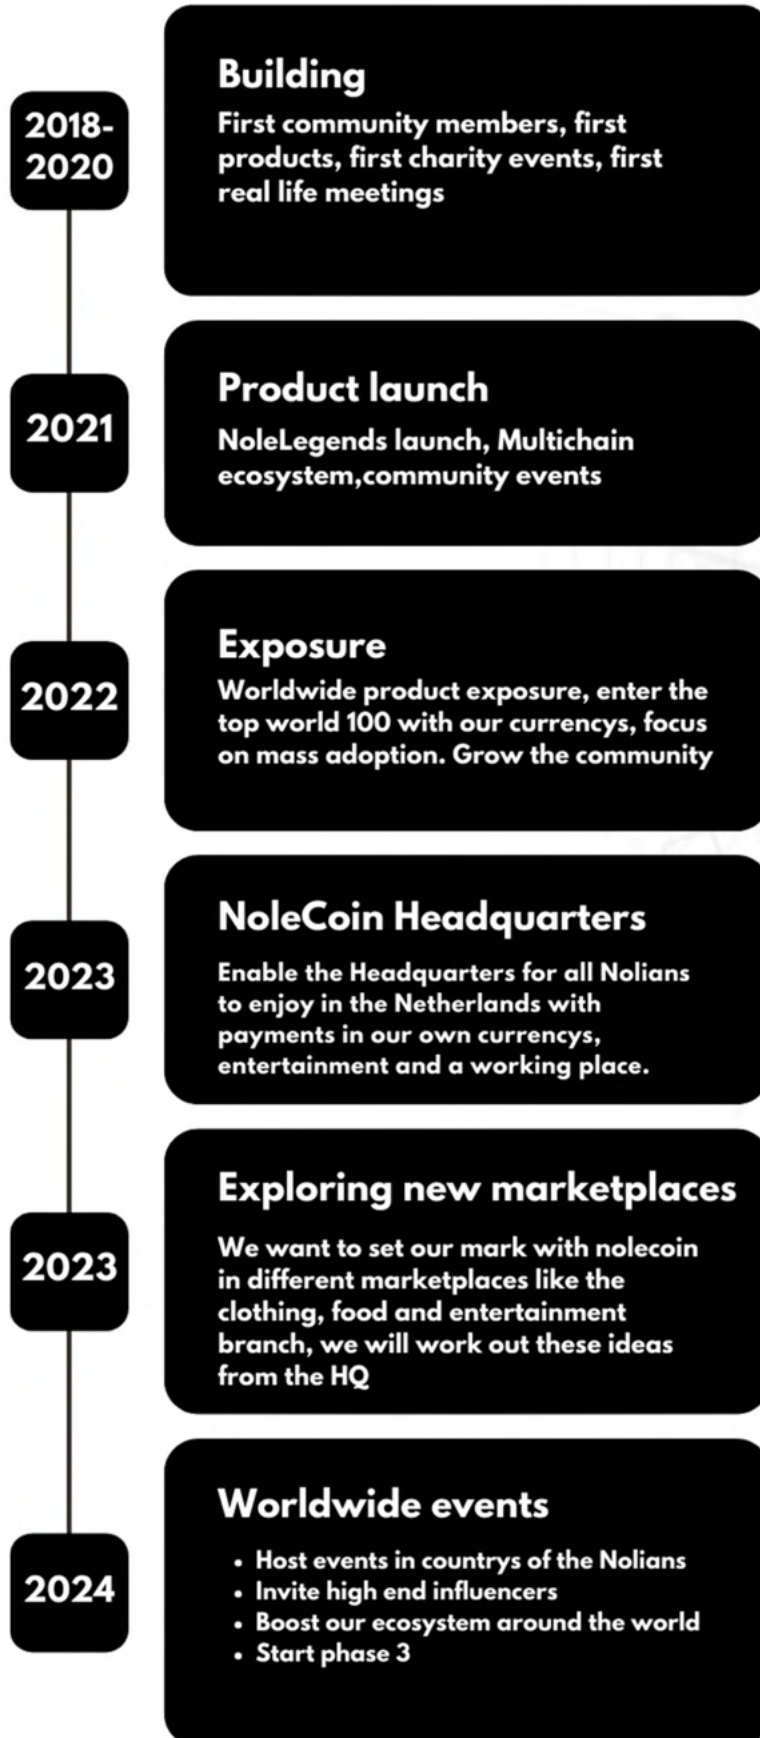

1'000'000'000 initial supply
Exploring BSC with **BEP20**

8% fee on every transaction
25% to holders & 25% burnt forever

4. Roadmap

Future

NoleCoin will be upgrading the NoleLegends game to a real life metaverse where all the Nolians can interact with each other, earn an income, and have a social life. We want to set a mark in the metaverse!

The metaverse can be defined as a simulated digital environment that uses augmented reality (AR), virtual reality (VR), and blockchain, along with concepts from social media, to create spaces for rich user interaction mimicking the real world. In the upcoming years this market will be one of the most successful markets in history since we are about to change our way of interacting as human beings and NoleCoin want to take part of this exciting journey.

NoleCoin will start up a first real-life headquarters in The Netherlands where Nolians can work together, exchange ideas, network with each other and organise meetings. We will do this in a later stage of the project.

NoleCoin will extend its reach outside of the blockchain and start focussing on the retail customer that doesn't know anything about blockchain yet. we are planning to do this in several sectors like entertainment, food, clothing, and more.

The NoleCoin logo will be seen in several places outside of the blockchain space to innovate and grow.

We will upgrade our philanthropic events and start travelling the world to see where we can aid our fellow human beings to better their life and educate them about the blockchain, we will do this after the ecosystem is fully established.

We will dedicate our time and funds to grow, innovate enrich our following and create history for all of us to enjoy.
